UI Final Project Writeup

1. State your name and the names of your team members.

2. State the name of your application, and briefly explain what it does in 2-3 sentences.

3. Please post a link where I can view a video demonstration of everything your application has to offer. If you uploaded the video to canvas, just tell me. **Make sure to show that your application adapts to different scales!**

4. What was your "original idea" for this application? Please explain how it works.

5. What visual direction did you take your project in? Please briefly explain how this informed the final look of your submission.

6. How can I change the styling of your project (theme, color, shape of elements, layout, etc.) Is this handled throughout the code, or is there a nice singular spot where it can be configured? Please explain, show code if necessary.

7. Do I have permission to share your project submission with future sections of the class? (yes / no)
